Welcome message

In collaboration with Aqaba Medical Sciences University (AMSU) and Jordan Medical Association (JMA), we are glad to announce the "Physician-Scientist" Summit, which aims to be an important point in the scientific medical research landscape in Jordan, providing collaborative opportunities, scientific tools, and knowledge to Jordanian physicians at all levels.

This Summit will connect physicians from all sectors with medical companies and institutions in Jordan, along with policymakers in the medical and scientific fields. Physicians will acquire the knowledge and capabilities of scientists, from research skills, critical thinking, tools, and connections. The summit will introduce a new international, peer-reviewed medical journal in Jordan, which will have a renowned editorial board, along with an associated teaching platform that will be made freely available to attendees. During the summit, attendees will join a comprehensive and practical certified research course, detailing the steps from research idea to publication. The summit will also host several bright-minded people, who will be open to collaboration with attendees. Other events to be conducted during the summit include a speech on the newly established Aqaba Medical Sciences University (AMSU). Moreover, medical companies will present the evidence behind their drugs.

We hope this gathering will have a positive and long-lasting impact on your career and the career of the students and doctors you mentor.

PHYSICIAN SCIENTIST SUMMIT

Registration

8:00 – 9:00am

Get your badge & drink your welcome coffee

Session 1: Connect and Collaborate

9:00 – 11:30am

Explore collaborative opportunities with Jordanian medical institutes

Symposia: Explore and Network

12:00 – 1:00pm

Explore recent advances in healthcare and technologies and network with attendees

Session 2: Research Course

1:00 – 4:00pm

Comprehensive research course detailing how to do research from idea generation to journal publishing

Program: Session 1

8:00

**Registration & Welcome
coffee**

9:00

National Anthem & Quran

9:15

**Welcoming remarks &
New Platform
Inauguration**

Dr. Saif Aldeen Alryalat

9:30

11:30

Coffee break

-

Program: Symposia

12:00 - 12:30

EYRIS

From research to multimillion company. How the Singaporean multimillion company evolved from a simple publication

12:30 - 12:45

MS PHARMA

Clinical Trials for antidepressants

12:45 - 1:00

NOVARTIS

Phase 3 clinical trial: A detailed example for a well conducted trial

Program: Session 2

1:00 - 1:30

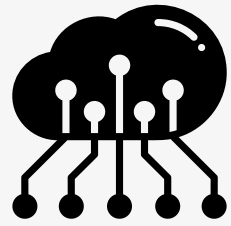

RESEARCH IDEA

How to generate and validate publishable research ideas

Dr. Saif Aldeen Alryalat
Dr. Amjad Shatarat

1:30 - 2:00

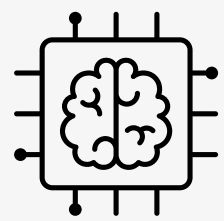

DATA

Obtain data through surveys, open data, bibliometric analysis, among other data sources

Dr. Saif Aldeen Alryalat

2:00 - 2:30

AI IN MEDICINE

Obtain data through surveys, open data, bibliometric analysis, among other data sources

Dr. Mousa Al-Akhras

2:30 - 3:15

ANALYSIS

Analyze your data efficiently using High Yield dedicated platform (auto-analysis) along with SPSS and R

Dr. Iyad Sultan
Dr. Hamze Alduraidi

3:15 - 3:30

ETHICS

Understand the ethical considerations in medical research

Dr. Soukaina Ryalat

3:30 - 4:00

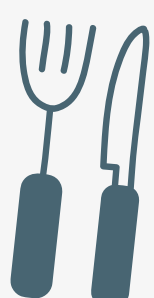

WRITING & PUBLISHING

Write the manuscript efficiently and publish in most relevant journal

Dr. Abdulrahman Shudifat
Dr. Saif Aldeen Alryalat

4:40 - 6:00

Lunch
